Application/Control Number: 10/652,643

Art Unit: 1725

1. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Page 2

It is not clear whether 3 or 4 of the mold sections are claimed.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 2, 4, 8-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Blazek (4,702,298) or Blazek et al. (4,170,256 or 4,066,116).
- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 10/652,643

Art Unit: 1725

6. Claims 3, 5-7, 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Blazek (4,702,298) or Blazek et al. (4,170,256 or 4,066,116).

Page 3

Each of the prior art references substantially shows the invention as claimed except that they do not show to provide a core for forming a interior surface of the blade (claim 3), the filling level of the molten metal (claim 5), the filter (claims 6 and 13), assembling patterns on top of a plate (claim 7), disassembling step (claim 11) and the composition of the alloy. However, it is conventional to provide a core for forming a hollow air passage for a turbine blade and to use Ni or Co base superalloy for casting the same, to provide a filter in an investment mold for filtering inclusions, to obtain an optimal filling level through a routine experimentation, to provide a working platform for assembling the patterns, to disassemble the mold assembly as soon as the solidification is complete.

- 7. The patent to Aubrey, Mills et al. and Phipps, Jr. are cited to further show the state of the investment casting art.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuang Y. Lin whose telephone number is 571-272-1179. The examiner can normally be reached on Monday-Friday, 10:00-6:30,.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas X Dunn can be reached on 571-272-1171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
